

Water Resistant LED Grow Light

Overview:

- The only water resistant LED grow light in the market
- Voltage: 110V to 240V
- Light power: 156W
- Power of single diode: 3W
- Beam angle: 90° or 120°
- Wavelength: 660nm, 630nm, 600nm, 460nm, white or other
- Ideal height above plants: 0.5'--14'
- 2 years warranty
- Completely silent

Applications:

- 🚦 Greenhouse grow light
- 🚦 Hydroponic grow light

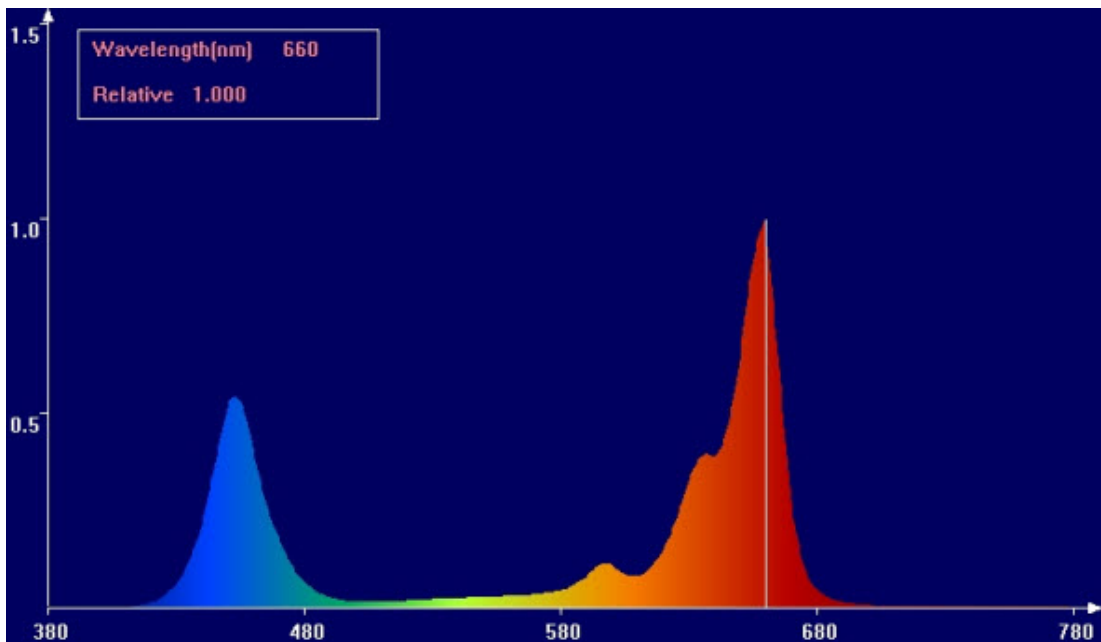

Features:

- Promotes plant growth, budding, and flowering
- Replace 600W to 750W HPS/MH grow light
- Saves 80% more on energy compared to HPS or MH light
- Easy to install and use, plugs directly into an (120 to 240V) electrical outlet
- Reduces grow room temperature 50 to 60°F compared to HPS/MH light

Specifications:

Item	Value	Item	Value
Voltage	110/240V, 50/60Hz	Size	24.2"×9.6"×3.7"
Power	156W (52×3W)	Packing	25.6"×11.1"×5.3"
Current	0.65~1.25A	Net weight	16.5lbs
Color	red, amber, orange, blue, white or other	Working environment	-4~104°F
		Storage condition	-40~185°F
Lifetime	50,000 hours	Height above plants	0.5~14 feet

Spectrum distribution:

Cautions:

- Before assembly or maintenance, make sure the power is off
- Before connecting the cord, check that the voltage is correct
- Don't place anything on the unit
- This product is for indoor use only
- Do not spray water on it to avoid damage
- Suitable environmental temperature is approximately -4 to 104°F
- Ensure lamp is securely installed; improper installation could cause injury
- To avoid electrical shock, do not disassemble the unit
- If there are any problems with quality, please return to your local distributor
